

YUDA FATAH KURNIAWAN

SOFTWARE DEVELOPER

Profile

I'm experienced working in IT Development as a professional. I've been working in many roles of IT development like as a full-stack developer, back-end developer, database developer, front-end developer, web security and sysadmin. I've experience working in department which is requires me to do multiple role of IT development tasks. As a freelancer and employee I've been working on microservices api-driven architecture and monolithic architecture as a team and individual. My latest programming language I used are C# with .Net Core and Java with Spring Boot framework. I would be happy if someone later offers me to work on new technology. In my professional journey I really like doing research and development of new technologies.
